SUMMARY

I am a BCA graduate with a strong proficiency in JavaScript, Node js and MongoDB. I have hands-on experience in frontend and backend development. I have successfully built multiple projects utilizing the REST APIs, and Mongo DB. Currently, I am seeking a Java Developer or Backend Developer position to leverage my technical expertise in software development.

EDUCATION

Saurashtra University   *Rajkot, Gujarat*
Bachelor of Computer Application – **(BCA)**   2022 – 2025
- CGPA :- 8.2

Shree H.R.Gardi High School(XII)   *Nana Ankadiya, Gujarat*

Shree H.R.Gardi High School(X)   *Nana Ankadiya, Gujarat*
SSC – Gujarat Board   2019 – 2020

SKILLS

Technical: Javascript , Java, React.js, Node.js, Express, C/C++, HTML, CSS, Spring Boot, Spring MVC
Database: SQL Server, MongoDB, MySQL, JDBC, Oracle
Tools: Git & GitHub , Eclipse

CERTIFICATIONS

- In GeeksforGeeks Saurashtra University Ranking for Solving Problems**.** *([Link](#))*
- Advance Java Development *([Link](#))*

PROJECTS

GPS–Tracker App *([Link](#))*   *Apr 2025 – Present*
- A Real-time GPS tracking system using a secure REST-ful API with Node.js and Express, implementing user authentication and role-based access using JWT to handle user data, device login, and tracking endpoints.

Instagram–App *([Link](#))*   *Oct 2024 – Mar 2024*
- Developed a full-stack Instagram clone using React.js, Node.js, MongoDB, and Tailwind CSS.
- Replicating core features like user authentication, real-time posts, likes, comments, and Reels.

Past–App *([Link](#))*   *Jul 2024 – Aug 2024*
- Past App is a sleek, user-friendly application built with Vite and React, designed to help users track and reflect on their past experiences.
- The app features a modern interface, allowing users to easily login events, memories, and insights.

Leet Metric & Countdown Timer *([Link](#))*   *Nov 2023 – Dec 2023*
- The Leet Metric feature in this Java project is a utility that converts standard English text into "leet speak" (1337), a stylized form of writing commonly used in hacker and gaming communities.
- Countdown Timer in this Java project is a utility that counts down from a specified time to zero. It is useful for time-based applications such as quizzes, task timers, productivity tools, or game mechanics.

ACHIEVEMENTS

- Leadership Management & Team Working in Project
